Introduction

A normal slide

Body text is Libertinus Serif; titles are Libertinus Sans; maths is Libertinus Math.

- A point with **bold** and *emphasis*.
- Inline maths sits comfortably in the text: $\sum_i p_i = 1$.

A few details

A fuller slide

- `trantor` is a customisation of the `ltx-talk` class.
- Its look is freely inspired by the `metropolis` beamer theme.
- Section names on each `\sectionpage` are clickable.
- Swap `\frametitle` for `\stitle` on dense slides to have more space below the title.
- Example display math:

$$\langle A_0 B_0 \rangle + \langle A_0 B_1 \rangle + \langle A_1 B_0 \rangle - \langle A_1 B_1 \rangle \leq 2.$$

- Numerals & symbols: 0123456789 ✓ ✗.
- Cite with `\footline` (below), or tag a statement with `\arxiv:` `arXiv:1508.05949`.

A standout panel

Alerted text takes the accent colour, and quotations are set in italic, both as under beamer:

The best way to predict the future is to invent it.

A standout line, for emphasis inside a normal frame.

An untitled, \plainpage frame: no header, no footer.

The end

A backup slide

Appendix frames restart the count: this page is numbered 1 / 1.
